Spare Parts

Designation	Part number
AIR MOTOR 7000 SEAL KIT	146371040
POLYVALENT SEAL KIT (03) FOR C160 - PE + PTFE	144050413
SEAL KIT (04) FOR C160 - PE + LEATHER	144050414
MAINTENANCE KIT C160 HYDRAULIC SECTION	144050160
SEAL KIT (05) FOR C160 - PE + PTFE G	144050415

Azur 72C160

Airless Paint Pump

Airless / Pumps

ADDICTED TO WORK

- High finishing protective coatings applications
- Designed to operate well in harsh and intensive environments
- Simple maintenance and comfortable to use

Markets

Azur 72C160

Airless Paint Pump

Azur range is the recommended line for the protective coatings market. The pump will transfer material without compromising your finish quality whether you are using single component paints, pre-mixed 2K, zinc-rich materials, and other types of coatings.

This Azur paint pump range is the best partner to spray protective coatings: Pressure stability, broad suction power, no downtime, and minimal noise pollution. Four patent-pending technologies to protect the quality of your job: No leaks, no freezing, and no stalling.

This pump can work for hours in extreme conditions to let you focus on the job. The pump design allows for quick and easy on-site maintenance. The size of the hydraulic section allows you to work with multiple guns, depending on tip choice.

Tip caliber	Orifice diameter (inc)	Number of gun recommended
Up to 18	Up to 0.019	2
From 25 and above	From 0.021 and above	1

In combination with our SFlow® spray gun, this solution will ensure the best finish quality while substantially reducing your paint consumption and reducing overspray. Azur pump range comes with a choice of (3) different packings to fit most applications: PE / PTFE, PE / Leather, and PE / PTFE G.

Technical data table

Designation	Value	Unit: metric (US)
Pressure Ratio	72/1	
Maximum Fluid Pressure	432 (6.265)	bar (psi)
Air Consumption	124	m³/h (cfm)
Sound Level	77.2	dBa
Fluid Output at 20 cycles/mn	3.2 (0.84)	l/mn (gal/mn)
Air Inlet	F 3/4" BSP	
Fluid Outlet	M 3/8 NPSM	
Fluid Inlet	M 1 1/4" G	
Number of Cycles per liter of products	6	
Wetted Shares: Stainless Steel	♦	
Weight	80.3 (177)	kg (lbs)

Technologies

Cup Lub

2 Ball

Self strained packing technology

VDE air motor technology

PERFORMANCE

- 1 Constant performance whatever the weather conditions: potential icing, high humidity, and extreme temperatures
- 2 Fast pump changeover design to eliminate pulsation during spraying
- 3 SST hydraulic section as standard (not carbon steel) compatible with new water-based coatings
- 3 Minimal dead zones: Efficient and fast flushing (ideal for hot-potted 2K materials)

PRODUCTIVITY

- 4 Large 2in suction hose assembly to handle higher viscosities up to 30,000 cps (optional)
- 5 Minimum downtime with quick hydraulic and foot valve knockdown and easy access to upper sealing
- 6 Protected lubrication cup to prevent material contamination
- 7 Storage compartment for convenient and easy access to accessories
- 8 Easy to operate convenient gravity hopper (optional)

SUSTAINABILITY

- 1 Reduced noise pollution due to an enhanced air motor exhaust / muffler design
 - 9 Innovative throat packing design with self-adjusting V-packing seals for longer life (no manual packing gland adjustment required)
- ♦ Designed with fewer components for less inventory and user-friendly maintenance.
