FPro G

Manual Airspray Spray Gun Gravity

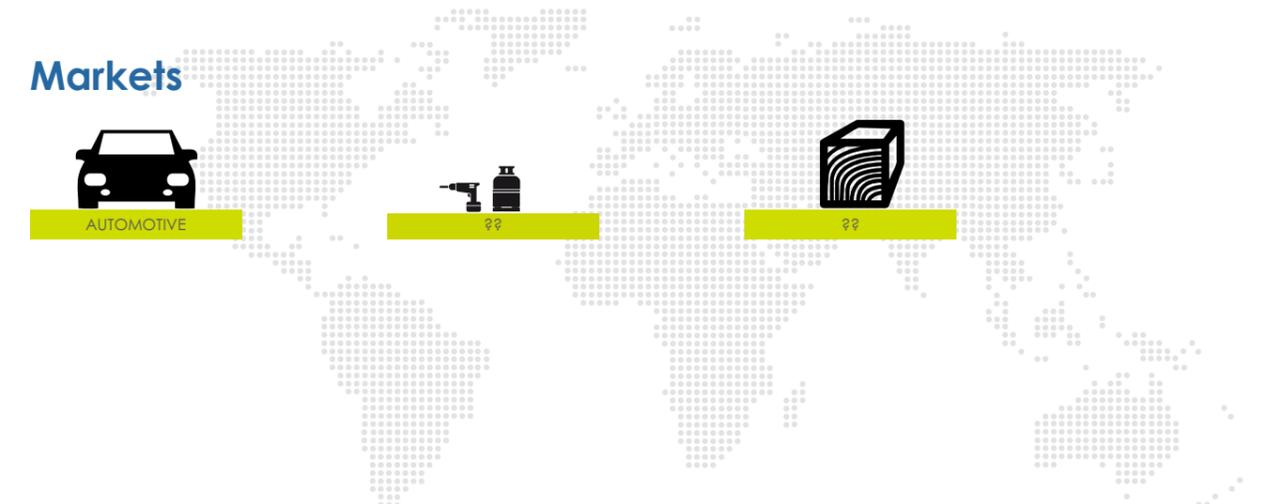

?????? / ?? ?

PREMIUM INDUSTRIAL FINISHING FOR ALL !

- High spraying quality
- Modular gun for a large range of application
- Ergonomic and robust design

Markets

FPro G

Manual Airspray Spray Gun Gravity

FPro G is THE gravity-fed spray gun solution to tackle material loss issues. Moreover, it delivers a very high finish quality for low viscosity material and with an excellent operator comfort. Perfectly balanced, the FPro G, gravity paint spray gun, provides a superior finish for all professional painters in the industrial markets.

The FPro G from **Sames** is the new star in the world of low pressure gravity-feed spray guns. This new technological gravity gun, available in HVLP, LVLP and Conventional technologies, is the best choice to ally high finishing quality and comfort of use. Once more, **Sames** avails of its Vortex technology to improve the transfer efficiency and the homogeneity of the spray pattern. More than a simple spray gun, the FPro G gathers high spraying quality and low air consumption to fit all the applications and requirements of professional painters.

Sames engineers have particularly worked on the FPro G gun body to be well balanced, ergonomic and light. The whole conception of the FPro G makes it perfect for an effortless spraying experience and an easy cleaning after your daily work. This new spray gun introduces also a brand new feature which leads to the lightest trigger pull on the market: the magnet assisted trigger (MAG-trigger). This technology enhanced once more the fact that **Sames** cares about the painters comfort.

Compatible with the SMART Cups and the GSP kit, the FPro G fits all the painters' needs. The large range of accessories offers a modular gun for all your needs !

Performance

- 1 Reduced overspray and perfectly balanced fan
- 2 Patent pending Vortex spin effect delivers a perfect atomization
- 3 Three different adjustment knobs to get the perfect spray pattern in every conditions
 - ♦ Large range of projectors for all applications
 - ♦ Three atomization and aircaps technologies: Conventional, LVLP and HVLP available versions
 - ♦ Compatible with a large range of materials, even the UV paints

Productivity

- 4 Ergonomic design with comfortable shapes
- 5 Redesigned gravity center for no effort on the wrist and reduced repetitive strain injuries
- 6 EZ-Adjust aircap for easy rotation adjustment without loosening the nut
- 7 The lightest trigger pull on the market thanks to the MAG-trigger, an innovative new technology
- 8 Improved trigger design to offer greater comfort

Sustainability

- 9 New lid designed for frequent color change and easy cleaning
- 10 Patent pending anti-drip diaphragm to protect the cup lid from the paint
- 11 Angle fitting for reduced hose strain
- 12 Large feeding choice: disposable cups or GSP kit for viscous application
 - ♦ No dead zones for an easy cleaning
 - ♦ Optimization of the spare parts inventory to simplify the maintenance
 - ♦ Designed from high-end materials for long service life
